Campbell Interurban Press

VOLUME 21, No. 28 — CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA — FRIDAY, JANUARY 14, 1916

Baking Powder: Our well known Farmers Union Brand: known for its freshness and purity. Owing to the big advance in the price of Cream Tartar we are forced to advance the price slightly; 35c per pound: 3 lbs for $1.00.

Cheese: Try some Martin's Eastern very fine. 25c. per pound.

Corn—Paris brand Maine Corn the best there is, 15c, 2 for 25c.

Peas—Del Monte, sweet and tender put up in sanitary cans, 15c.

Tomatoes—The Berryessa Brand is a very good substitute for fresh ones, 10c. per can.

FARMERS UNION BRANCH

We wish to announce that we have just added another sanitary feature to our dairy equipment in the way of a Hinman Milking Machine. In milking with this machine the milk is not exposed to the stable air at all nor is it possible for any foreign matter from the cow's udder to fall into the milk, thus producing milk with a very low bacterial count.

We cordially invite inspection of our dairy and method of handling our milk at any and all times.

Officers Installed In Lodgedom

Brotherhood of American Yeomen

The Orchard City Homestead B. A. Y. held its first installation at the I. O. O. F. Hall in Campbell January 5, at which the following officers were installed:

Edward O. Evans, Honorable Foreman.
Albert F. Bulmore, Master of Ceremonies.
Harry C. Smith, Correspondent.
Ellis W. Preston, Master of Accounts.
Josephine Gard, Chaplain.
Thomas A. Robinson, Overseer.
Emma E. Bulmore, Lady Rowena.
Ivy Frost, Lady Rebecca.
Albert S. Gard, Sentinal.
Fred Stoner, Watchman.
Clinton S. Crow, Guard.
Olga Evans, Musician.

Special Organizer Carl Anderson acted as installing officer, assisted by the following installing staff: G. C. Romenger, of San Jose, Chief Yeomen; Gladys Lowry, custodian of badges; Merle Isbel, special correspondent; Katherine Burns and Elena Robinson, guards; Emily Gard, musician.

After the installation, E. O. Evans was presented with a meritorious service button from the Grand Foreman.

Mr. Anderson then presented the homestead with a fine Yeomen couch cover as a present from the Grand Foreman.

The "harmony" male quartet, A. L. Adam, E. E. Lanphear, H. C. Smith and C. P. Herrington sang several numbers which were well received.

After the service of light refreshments in the banquet room, the tables were removed and a jolly time was passed in dancing.

Charity Lodge F. & A. M.

Charity Lodge, No. 362, held its installation, Monday evening when the following officers took their new stations.

W. M.—W. I. Merrill.
S. W.—C. E. DeSelle.
J. W.—R. G. Archibald.
Treas.—J. C. Ainsley.
Sec.—Jas Fablinger.
Chaplain—S. A. Moulton.
Marshall—I. W. Snow.
S. D.—T. L. Mendel.
J. D.—H. C. Smith.
S. S.—R. Alison.
J. S.—H. W. Morton.
Tyler—Chas. Townsend.

Retiring master I. W. Snow acted as installing officer, and Geo. S. Robson, master of ceremonies.

After the work a banquet was served at which several toasts and talks were given.

Whist Party

The home of Mr. and Mrs. Warren Shelly was very attractively decorated Thursday evening, when they entertained a few of their friends at a progressive whist party. Branches of pine, laden with cones, banked the mantel and piano, and sprays of mistletoe in odd places afforded much amusement.

Mrs. George Call of Mayfield secured the first prize for the ladies, and Ralph Hyde for the gentlemen, while Mrs. Ainsley and Mr. Call fell heirs to the consolations, which were so attractive they really lived up to their name.

Mrs. Call and Mrs. Hyde sang several charming songs and Mr. Shelly produced gales of laughter with his "ditties" and recitations.

Supper was served at small tables in the dining room and a jolly time around the fireplace completed the evening's pleasures.

Base Ball Benefit

On next Friday evening, January 14th the directors of the San Jose and Santa Clara Valley leagues will give an entertainment and dance at Maple hall, San Jose, for the benefit of their new baseball field.

Following is the program, in which some of San Jose's best artists will appear:

Muriel Graham, the child wonder, in local song hits.

M. Gramisky, pianist from Bosnia.

Hedonic Quartet in popular melodies.

John Speciale in songs. O. Engstrum, in a musical number.

The committee of arrangements consists of the following: E. I. Cunan, E. A. O'Brien, R. Champion, C. Stevens, P. Rea, R. Wentworth, Jack Wheeler and E. Haub.

Floor committee: J. Donahue, W. Wheeler and C. W. J. O'Brien.

Hat room: Jack Wheeler.

Door and tickets: E. A. O'Brien and E. I. Cunan.

Smith's assortment of stationery is becoming more and more popular.

Annual Banquet Pronounced Success

Record Attendance At Booster Meet

One of the most interesting and what will probably prove to be beneficial, meetings of the Improvement Club, was the annual meeting and banquet which was held Friday evening in the parlors of the Methodist church.

The Ladies Aid served the supper which was par excellence. The tables were very attractively set with Japanese fruit baskets, tied with bows of red crepe paper, and candelabra holding red candles with red shades. Everything was very good, and the serving well planned.

President B. O. Curry presided at the business meeting, and gave a short talk on the work of the past year. Election of officers resulted as follows: S. G. Rodeck, President; George S. Robson, Vice-President; F. S. Newcomb, Sec., and Roy Archibald, Treas. The treasurer's report showed a small balance on hand.

Miss Ruth Lloyd, accompanied by Prof. Jan Halamicek, gave a couple of delightful violin numbers that were greatly appreciated.

John F. Duncan spoke on "Our Duty as Citizens in the Town", dwelling on co-operation, emphasizing relations between town and country, and individual responsibility.

The subject, "Our Schools" was well handled by Professors Snow and Kammerer. Mr. Snow told of changes already made or to be made in the courses of study to make High School work more practical. The new manual training building is under construction and the trustees are practically committed to a Domestic Science wing to be added to the High School building.

Mr. Kammerer outlined briefly a few lines on which the Grammar school has been working. Manual training classes have been "doing for Others", the sewing classes helped with the costumes for the Christmas exercises, and the 8th grade girls are planning to make their graduation dresses. The school now has a branch of the County Library and is working toward securing the "Standarization Tablet" given by the County Superintendent.

The present undertaking of the Fire Company was explained by E. E. Lanphear and the support of the citizens requested in defraying the expense of the new fire hose, and installation of new hydrants. The Water Co. is installing a new pressure pump and that with the new hose demands larger hydrants and mains.

"Woman's Work in the Community" was well discussed by Mrs. Ralston Alison. She mentioned some of the things which had been accomplished thru the efforts of the women's clubs. She gave a very comprehensive discussion of the condition of the Grammar school and urged the success of the next bond election.

Mrs. W. H. Higbie gave a number of very valuable suggestions in her talk on "Today—and Tomorrow". Co-operation among the residents of a street or block in the matter of flowers, shrubbery, paint, etc., would make greatly for beauty. Trash cans for papers, peelings and rubbish would mean more attractive streets. The edges of the orchards bordering the roads, cultivated and beautified a little, would add greatly to the looks of the country homes.

H. A. Griffin spoke briefly, endorsing the suggestions made by the ladies.

Judge Brown of San Jose entertained the company very delightfully with a short talk full of humorous stories with which he pointed his remarks. Everyone was in fine humor when he had finished.

Visitors from San Jose spoke briefly on the advantages to be gained from an interchange of visits and ideas.

The new president called for a report from the committee on lights and explained the plan which has been proposed, and can only be carried out thru the financial support of the property owners and citizens. Up to now the burden of the upkeep of lights has rested upon the shoulders of the business men and a few other generous citizens.

A vote of thanks was tendered the ladies who served the supper and the speakers. If all the citizens will co-operate and feel their individual responsibility much can be accomplished to improve our town during 1916.

The Improvement Club will take up this year's work at the regular meeting, Jan. 21st. Make a New Year's resolution to attend and help the work and your officers by your presence at the meetings.

The January birthday social will be held tonight, Jan. 14th, in the Congregational church. A very interesting program has been prepared. Everybody invited.

High Grade Coffee Service At a Moderate Price

The most exclusive coffee dealer can do but four things for you; these are, (1) give you coffee of quality proportionate to the price asked, (2) freshly roasted, (3) ground by the improved steel-cutting process and (4) cleaned from chaff. The last two items are seldom available in a medium priced coffee as the necessary equipment is too expensive for the ordinary dealer to install.

Blaine's Steel Cut Coffee is freshly roasted to our order, in small quantities, by one of the best equipped firms in San Francisco. It is steel cut and cleaned from chaff by the most modern machinery. The price is 30c. You receive 30c worth of coffee-quality plus the worth of the steel-cutting and cleaning.

Sold only in sealed packages—one pound net.

BRIDGE IS A WONDER

QUEBEC STRUCTURE SURPASSES ANY EVER ERECTED.

Only the Famous Firth of Forth Bridge in Scotland, Constructed in the Same Manner, Approaches It in Magnitude.

In its general dimensions as well as in the enormous size and weight of the structural members composing it, the Quebec bridge, now in an advanced stage of construction, surpasses any other structure of the kind ever erected, says Popular Mechanics. The one bridge structure in the world that approaches it in magnitude is the famous Firth of Forth bridge in Scotland, the main channel span of which is nearly one hundred feet shorter than that of the Quebec bridge. Both structures are of the cantilever type. The channel span of the Quebec bridge, measured between centers of towers, is 1,800 feet. The design and fabrication of the steel for the structure therefore presented engineering problems for which no precedents existed, and the first attempt to build the bridge made by a private company, resulted in a collapse of the structure in which many lives were lost. Following that catastrophe, the Dominion government took over the work, and a year later undertook the construction of the bridge. The present bridge is on the same site as the original structure, but owing to an increase of twenty-one feet in the width between trusses and to a considerable increase in the weight of the superstructure, new piers were necessary, and these were built immediately south of, and adjacent to, the original piers. The two main piers alone contain approximately 60,000 cubic yards of masonry and cost in the neighborhood of $1,500,000. One of these piers goes to a depth of sixty feet below the bed of the river, and the other to a depth of eighty feet. . . .

In the erection of the bridge the anchor arms, which lie between the main piers and the shore, were constructed on steel falsework, while the cantilever arms are being built out over the river without falsework by the cantilever method. The 640-foot suspended truss to connect the cantilever arms will be built on shore, floated into position on pontoons, and then raised by powerful jacks and connected with the cantilevers. For the erection of the heavy bridge members two traveling cranes, one working on each side of the river, are used. Each traveler weighs about one thousand tons, and is equipped with two hoisting machines each capable of lifting one hundred tons. The principal feature of the travelers is a tower that stands 200 feet above the floor of the bridge. Supported on top of the tower are cranes through which the lifting lines are worked. All the machinery on the travelers is electrically operated. To avoid bringing uneven stresses on the partly completed structure, similar members on the two sides of the bridge are lifted by the cranes and erected simultaneously. The total length of the bridge between abutments is 3,239 feet. As now planned, it should be possible for trains to cross the bridge by the end of the year 1916.

Aluminum in War.

Austria and Germany use more aluminum for war purposes than all the other warring nations combined. It has been known, in fact, that Germany has for some years been collecting and storing the metal for war uses.

The great majority of the drinking mugs, cans and cups of the German soldier are made of the light metal. The frames for Zeppelins and the fuses for shells are made from aluminum.

One of the difficulties the Germans have had to face is the shortage of copper necessary for the rings around shells. Many of the German shells are now provided with aluminum rings.

Although aluminum does make a substitute, even in cartridges as well as shells and fuses, it is not so good as copper. The French authorities experimented with it some years ago for artillery purposes, but rejected it. The Germans are using it in such large quantities because they're forced to do so on account of the shortage of copper.

Chase's Valuation.

William M. Chase figured amusingly in a transaction concerning himself and an unartistic congressman who owns a bad painting.

"Isn't that grand?" the latter remarked when pointing out his purchase. "A great bargain, too. Got it for four hundred dollars, and William M. Chase says it is worth ten thousand dollars."

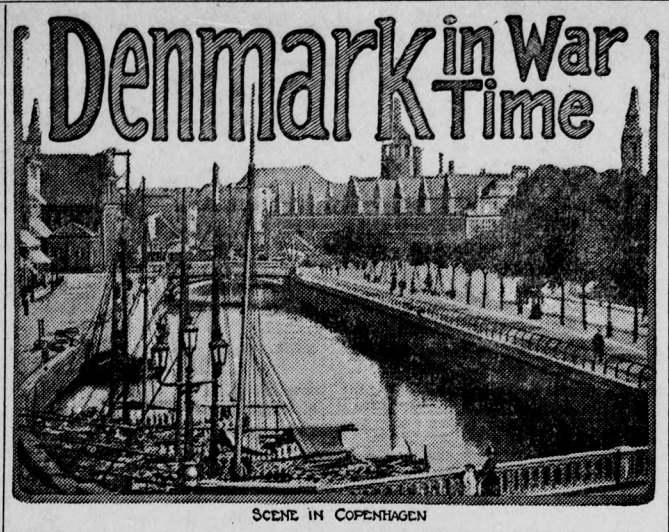
A friend of the painter heard this statement and took it to Chase, who smilingly explained:

"He cornered me one day and wanted me to fix a value on it, but I told him I couldn't do it. He then came at me with a question I couldn't dodge:

" 'Well, Mr. Chase, how much would you charge to paint a picture like that?'

"I assured him most earnestly that I wouldn't paint one like it for ten thousand dollars."

Denmark in War Time



SCENE IN COPENHAGEN

IT is impossible now to go from Christiania to Copenhagen by boat, writes Mary Ethel McAnley, from Denmark to the Pittsburgh Dispatch. All lines for passengers have been stopped on account of the mines, so one must go through Sweden by rail and then cross the North sea at Helsingborg. If you go at night the trains are taken over on a ferry, one carload at a time. As the ride is 16 hours long we stopped all night at Gothenburg, the great Swedish seaport town and second largest town in Sweden. It is a great, bleak sort of a place, not interesting, but evidently progressive, for it is the first place in Europe where I have ever seen any extensive building going on, and large houses were going up everywhere. This town is where the great Gothenburg system of controlling the liquor traffic first sprang from. I expected to see a very model place, but, alas! we met six drunken men in three squares. Perhaps they were only sailors off duty.

The first thing we saw when he landed in Denmark was the Kronberg castle where Hamlet lived. It is a wonderful old place, standing right on the sea. The people around there say that on dark and moonless nights the ghost of Hamlet's father comes out and stands on the ramparts, and waves his long white-robed arms.

The ride from Helsingborg to Copenhagen takes about an hour and on the way is Fredriksborg castle, where Queen Alexandra of England stays when she is in Denmark. Her suite of rooms is shown to the public when she is not in Copenhagen. Denmark is a country of palaces and the Rosenborg and Amalienborg are among the most beautiful.

Copenhagen is absolutely full of visitors, and when we arrived we went to eight hotels before we could get a place at any price, and the prices at some of the hotels were as bad as in America. Ever since we have been here we have seen taxicabs full of strangers frantically driving around trying to get a place to sleep.

ROSENBERG PALACE

Copenhagen is a very dirty town. The city evidently tries to keep things cleaned up, and everywhere you see the sign "Spytning formudt." This does not mean spying forbidden as it at first seems, but merely spitting forbidden. Everybody here rides the bicycle, from the boy of six to the woman of seventy. The bicyclers take up all the street room and part of the sidewalk. They are very much like the taxis in New York city—they don't care whether they run over you or not.

Are Partial to Phones.

Next to bicycle riding the most popular exercise is telephoning. Everybody telephones all the time, and the little bells jingle everywhere. Every street corner has a telephone booth. These booths look like a cupboard standing on a table. When you want to telephone you step inside the table, put your head in the cupboard, close the doors and none of the outside noises can be heard. If you see a fine building in Scandinavia, it is not a bank, nor a hotel, nor yet a palace, but it is a telephone building central.

The food in Scandinavia is so different from that in America that many Americans become sick when they try to live on the same things that the natives do. They don't eat fruit and vegetables, but live on bread, fish and meat. The Danes are like the Norwegians, for they adore fish, and even eat fish sandwiches for breakfast. An American lady we know here in Copenhagen went to a dinner party and she was served with cold boiled codfish, and cold fish gravy tough as leather. She was polite and ate it, but as a result she was sick all day.

The Copenhagener likes to think himself very Bohemian, especially in his cafe life. The women also boast of being Bohemian, and a great many of them smoke cigars and drink whisky. One can often see a young woman enter a cafe, hang up her hat, flop into a chair and order absinthe and a cigar. The Danes are great drinkers and the wine they drink takes the place of the fruit we eat in America.

The Danish women are not nearly so attractive as the Swedish and Norwegian girls, and the women of Copenhagen are not so stylish as the girls of Christiania. In Christiania one seldom sees a fat man. There the men are all big and rather angular. Here in Copenhagen the men are inclined to be fat, and they are much shorter than the Norwegians.

Things are not very expensive here in Denmark, except the things that are imported from Germany. We paid 50 cents for a small leather strap and the salesman said that all the leather goods sold in Denmark were imported from Germany, and that the manufacturers of Germany were so busy making war material that they had no time to make straps. Fruit is, of course, very dear. A bunch of grapes costs a dime. In one window we saw displayed "American Cornmeal." It cost 10 cents for a cupful. The people don't buy it, and they would not know what to do with it if they did.

We asked if there were many people going to Berlin and the bureau said that the trains were crowded all the time, mostly with business men, who had been in Copenhagen trading. The trading that is going on is enormous, and the boats and trains are loading and unloading all the time. There is work for everybody, for besides the trade created by the war, they are turning a big boulevard into a canal. The people are not so gay as in other years with so much to do. The war has sobered them down.

Copenhagen is full of soldiers, officers, privates and generals, and proud is the maid that goes swinging along hanging on to the arm of an officer. While the officers are not so absolutely enchanting as the Viennese officers some of them look very nice. We passed the barracks at dinner time and we saw the privates down in the cellar of the building eating. If that is what they get in time of peace I wonder what the poor fellows would get if Denmark should get into war. They had the roughest kind of food which they seemed to be eating with a relish. Everywhere soldiers are training, but Denmark does not believe that there is any danger of her being dragged into the war.

HARVESTING OF SILAGE

Corn Must Be Cut at the Proper Stage of Maturity.

Most Economical Succulent Food That Can Be Obtained for Dairy Cows at a Season When Pasture Is Not Available.

(By WILBUR J. FRASER, Illinois.)

It is of great importance to know at what stage corn should be cut to secure the best results, how rapidly nutriment is stored up in the corn plant as it approaches maturity, and when the maximum amount is reached.

To have the silage keep well the corn must be cut at the proper stage of maturity. If cut before it is sufficiently matured, too much acid develops. If too ripe, it does not settle properly and the air is not excluded.

Cutting and Storing Silage.

Corn should not be cut until the ears are out of the milk and most of the kernels glazed and hard.

The corn should be cut with a corn binder, as it is much more easily handled when bound in bundles. If the silage cutter is large and the work is done with a good force of men, the corn binder should have a start of half a day. If enough horses are used on the binder to keep it moving at a good pace the corn can be cut down as fast as it can be put into the silo. Using a small cutter with a large engine is dangerous unless great care is exercised in controlling the power.

If silage is to keep well it must settle evenly. To this end the leaves and the heavier parts of the corn must be kept thoroughly mixed and evenly distributed in the silo. Owing to the great pressure of silage, friction with the sides of the silo has a tendency to make the silage less compact at the edge, and for this reason it should be thoroughly tramped next the side. Every time three or four inches of cut material is added to the silo it should be tramped thoroughly around the edge, taking short steps and packing the silage as much as possible next to the wall. These precautions must be observed during filling to obtain perfect silage.

After filling, the top six inches should be wet once and the whole surface tramped every day for a week to obtain a thin, compact layer of well-rooted silage which will exclude the air.

Properly prepared, corn silage is, as a rule, the most economical succulent food that can be obtained for dairy cows at a season when pasture is not available. Although not a balanced ration in itself, it tends to heavy milk production and economical milk can be made by feeding corn silage and a legume hay without the use of much grain.

PLAN TO STORE VEGETABLES

Bruises Form a Place for Decay Germs to Enter—Dry in Sun Before Putting in Storage.

(By H. O. WERNER, North Dakota Experiment Station.)

Vegetables must be stored under the conditions that will keep them in the best condition for use.

In the first place they should be handled carefully. Bruises form a place for decay germs to enter. The vegetables store best if a little immature. Cabbage, celery and root crops keep best at low temperature, with a fairly moist atmosphere and good ventilation. Onions keep best just above freezing in a dry atmosphere. Squash and pumpkins need a dry atmosphere at about fifty degrees. Celery when dug is really transplanted as it has to be kept growing when in storage. Dig it with a good deal of soil on the roots and plant closely in sand or loose damp soil in a cool cellar or pit. The root crops keep best when buried in sand or soil in a cool place. The vegetables, excepting celery, will keep better if well dried in the sun before being stored.

Don't Tolerate Weaklings.

In your culling weaklings should never be tolerated. Kill and bury the runts and crowheads. Roup is infectious and the weaklings are the ones to first become infected.

GIVE HARNESS BEST OF CARE

When Placed Just Behind Work Team Leather Becomes Brittle and Sometimes Breaks Very Easily.

Many farmers hang their harness in the barn just behind the work team so that it will be handy when wanted. Of course it is convenient and can be thrown onto the backs of the horses in a few minutes, but there is a considerable loss in hanging the harness at the back end of the stall.

There is a constant passing off of ammonia from the manure behind the harness and this has a bad effect on the leather of the harness. This is the reason why a harness that is allowed to hang in stalls cracks and dries out, becomes brittle and sometimes breaks very easily. One would have to keep the leather thoroughly soaked with oil to prevent injury from the action of the ammonia.

Then there is danger of harness being thrown down into the manure of the stable by the constant passing of the horses from the lot into the stalls. When it is thrown down and tramped into the manure it is filthy to handle and is injured by the action of the damp manure.

The best plan is to have a room in the barn in which to hang the harness. It is even better to hang it in the hallway than over the manure. The room need not be large. Everything in it may easily be kept in proper order, and all repair material should also be located here. This room should be free from mice and rats, for these rodents are destructive to leather.

DIG HOLES BY HORSE POWER

By Use of Soil Auger Farmer Is Enabled to Avoid Much Manual Labor and Twisting of Back.

A soil auger by means of which the farmer may make his horse do the heavy work of post-hole digging, instead of twisting his own arm and back muscles, is here shown. The outfit is simple to operate. The horse pulls a rope through a grooved pulley, this action revolving the auger. All the auger operator has to do is to press downward on the handles. When the auger is full the horse is stopped and the earth shaken out. This is repeated until the hole is of the desired depth. From 35 to 45 feet of rope is pulled out to complete a three-foot hole, nine inches in diameter. In making the first hole, a stake is driven into the ground to fasten the anchor cable to. After the first hole is bored, an anchor post is used, the anchor cable serving to measure the distance from hole to hole, as well as to keep the auger upright during the boring.

Pulling of Rope Revolves Auger.

At one end of the anchor cable is a short piece of chain, the purpose of which is to allow the cable to be quickly shortened should the auger begin to lean.—Popular Mechanics.

EGGS ARE "FANCY"

When fresh, clear and full-bodied.

When shells are sound, clean, bright and of uniform color.

When they weigh 24 ounces or more to the dozen.

It pays to produce and market fancy eggs.

SWEETEN SOIL FOR ALFALFA

Sourness Can Be Corrected by Application of Air-Slaked Lime—Test With Litmus Paper.

Alfalfa will not do well on sour or acid soil. Before growing alfalfa, the soil should be tested with blue litmus paper, which can be secured from a druggist. Take a handful of moistened earth from a few inches beneath the surface of the ground and press into a ball. Break this mud ball into halves and place a strip of blue litmus on one of the halves and cover with the other. After five minutes examine the litmus paper, and if it has changed color from blue to a distinct pink or becomes spotted with pink spots, the soil is acid and needs lime for successful alfalfa growing.

On sour soils from two to four tons of air-slaked lime or ground limestone rock or marl or lime refuse should be applied. Whatever form is used it should always be applied to the surface of plowed land and harrowed or disked in. It may be put on in the fall or early spring—prior to seeding the alfalfa. Lime distributors are desirable when large areas are limed, but with small acreage it can be conveniently spread with a shovel.

Table Scraps Good Feed.

The table scraps should be saved and fed to the hens. Table scraps make rather a rich feed, and therefore should not be thrown indiscriminately before the fowls, but should be prepared and cooked and fed to them regularly once a day.

CHANGED HER VIEWS

Aunt Emily Saw Things in a Different Light.

Ready to Kill Driver Who Had Almost Run Her Down, But Had No Mercy When She Was in the Auto.

In a street in Richmond stood Aunt Emily, with her hat askew upon her woolly old white head, and a large and vicious-looking cobblestone in one hand. She had every appearance of a staid colored mammy of the antebellum strain, who had determined to break somebody's jaw and was about to begin the assault. Amid wagons, taxicabs, traffic of all sorts dashing madly at auntie from all sides, she held her ground valiantly, evidently determined not to fire that rock until she saw the whites of her enemies' eyes.

While thus engaged, and while the fire shot from her outraged eyes, a gentleman drew up to the curb in a finely-equipped roadster and called out to her:

"What in the name of common sense are you doing there, auntie?"

To which the belligerent one replied:

"Lawsie, Mistah John, one o' these yer autovillains come 'long jes' now and lak to knock me down. An' Ah jes' gwine stay hyeh tell he come back, and Ah spects to brek he haid wif dis yer rock."

"Look here," said the man, "Miss Lou is waiting for you to come home and get luncheon ready. Step into

A Large and Vicious-Looking Cobblestone in One Hand.

this car and I'll drive you home."

Auntie pondered for a moment before replying:

"Ah nevah road in one dose contraptions."

"I'll take care of you. Hurry up now."

So auntie gathered her voluminous skirts, and with many evident misgivings took her seat in a racing road car that could touch ninety miles an hour and never feel the strain. She clung to the seat tightly as the car started off, and hung on for dear life as it swung a corner. She grabbed "Mistah John" by the arm in her fright and begged him to let her out as they threaded neatly through the crowded Richmond thoroughfares.

She was in utter and abject misery from fear and the tears rolled down her cheeks.

But Mistah John took to the straight road soon and set forth for the suburbs. The way was clear and he let out a few links in the engine and the engine hummed like a bee and sailed down the path like a bird. Auntie began to feel like she was flying, and her fear gave way to a sensation of grand delight, and by the time she had gone ten miles she was singing softly to herself and settled back on the seat like an oldtime racer.

"Ratch-atch-atch atch" went the raucous horn (Notice they don't say "honk, honk" any more).

"What you do dat fo' Mistah John?" asked auntie.

"I wanted to warn the colored boy to get out of the way."

And then auntie replied.

"Shucks, Mistah John, jes' yo' run ovah dat fool niggah. What right he got in de way nohow?"

Which goes to show, as Winfield Larner says, that practically everything depends on the point of view.

Remarkable Dental Work.

A dental achievement of a most remarkable nature was recently described at a lecture in London. It was stated that during the battle of Neuve Chapelle a young officer, a lieutenant in a Highland regiment, had his face half-turned upward, when a piece of shell struck the left side of his face and blew away most of the lower jaw. Incredible though it may seem, the doctor put a new floor to the man's mouth, actually induced two inches of bone to grow on the lower jaw, fixed complete artificial teeth and healed the remains of the lips, with the result that now the man is as normal as ever, and the only result of his mishap is a slight scar on the mouth.

Perpetual Restraint.

"When I was a boy," said Mr. Cumrox, "my father used to reprove me for reading dime novels."

"It was meant for the best."

"But a person ought to get beyond that sort of discipline sometime. Now my daughters reprove me for wanting to see all the moving pictures."

The Masculine View.

His Wife—Isn't my new gown quite becoming to me, dear?

Her Husband—Sure thing. And I suppose the bill for it will soon be coming to me.

CATARRH IS STAGNATION
PE RU NA IS INVIGORATION

Catarrh means inflammation. Inflammation is the stagnation of blood—the gorging of the circulation with impure blood.

Of course you can't be well under this condition. It means, headaches, indigestion, kidney trouble, coughs, colds, etc.

Peruna By assisting nutrition increases the circulation, invigorates the system, removes the waste matter and brightens you up.

Over 44 Years

Of service to the public entitles it to a place with you.

It Makes Good

The Peruna Company Columbus, Ohio

You can get Peruna in tablet form for convenience.

DIVIDEND NOTICES

Associated Savings Banks of San Francisco.

HINTS FOR THE HOUSEWIFE

Small Things, But Well Worth Keeping in Memory or In Convenient Book.

Dark calicoes should be ironed on the wrong side with irons that are not too hot. The raveled threads from old linen will be found best for darning tablecloths or napkins.

To remove automobile grease or any dark, heavy grease from washable fabric, rub on a small piece of butter and rub in well, then wash with soap and rinse and the oil and grease will have disappeared.

The turkey need not be sewed after the dressing has been put in. Insert toothpicks on either side and string back and forth over the picks. This is easily removed after the bird is cooked.

It should be a matter of common knowledge, since flour is always within convenient reach, that wheaten flour is the best extinguisher to throw over a fire caused by the spilling and igniting of kerosene.

HOW ABOUT IT?

"If a man has the price he can get anything he wants and the way he wants it."

"Don't know about that. There's the medium soft-boiled egg."—Browning's Magazine.

"HEALTH" THE WATCHWORD

This Really Means,

PERFECT DIGESTION AND ASSIMILATION OF FOOD
LIVER ACTIVITY
BOWEL REGULARITY
RICH, RED BLOOD

HOST WAS PLAINLY RESTIVE

Football Player Wanted to Show High-Brow Company What He Could Do in Scrimmage.

"Henry," remarked Mrs. Twobble, "I've been thinking over something I want to say to you."

"Shoot!" said Mr. Twobble, briefly.

"What?"

"Excuse me. Proceed."

"I wish you would try to appear more at ease when we have company in the house. You are not afraid of people, I hope?"

"No," answered Mr. Twobble, thoughtfully. "It isn't that. The people you invite here make me so confoundedly uncomfortable with their high-brow talk that I sometimes wish they would try to start something, so I could show them what an old-time football player can do in a scrimmage!"

ALWAYS AND ANYWHERE.

The Preacher—Tell me what is the best foundation for success in business?

The Merchant—Rocks.

Surpaseed.

"Jinks won't let anybody get the better of him. No matter what they brag of he always has something better. What do you think he said when a man in a bunch where he was boasted of the fine ruby he had on his finger?"

"What did he say?"

"That it was nothing to the carbuncle he had on his neck."

A Bigger Haul.

"As I was coming home," said the man who had burst breathlessly through the door, "footpads set upon me and took my watch and scarfpin."

"How lucky," commented his wife, "that they didn't wait till Saturday night and catch you when you were coming home with the market basket."

Missing No Tricks.

"People are saying that you do not stand a ghost of a show at the next election."

"Good idea!" responded Senator Sorghum. "I have tried to get the influence of about every other organization. Maybe we can do something with the Society of Psychic Research."

High Art for Lowbrow.

Artist—You see, we moderns strive for the purgation of the superfluous, which throws the accent on the inner urge. Do you follow me?

Friend—No, I'm ahead of you. I came out of the asylum last week.—Life.

Queer.

"Had a queer thing happen as we were out in the auto the other day."

"Accident?"

"No. A fellow in a rig drove out of a side street two blocks ahead of us and ma, who was in the rear seat, never saw him."

Not Talking Much.

"What are you going to say when you address congress?" asked the friend.

"I don't know yet," replied Senator Sorghum. "After the opposition I have met with out home I don't feel called on to make long speeches. I'm lucky to be able to say 'Present!'"

Judicial Advantages.

"A magistrate has unusual domestic advantages over other men whose wives are always giving them a piece of their minds."

"What advantage has he?"

"When she starts in to give it he can bind her over to keep the piece."

Jewish Farmers.

A few years ago all the Jewish immigrants in this country were crowded together in city tenements. There are still millions of them in the cities, but they are going in great numbers to the farms. When the Federation of Jewish Farmers of America, which was organized only five years ago, recently held its annual meeting there were representatives from 63 local associations in as many rural communities in 11 states.

The Oven Door Ajar.

When broiling steaks or chops, if the broiling oven door is left open just a bit, there is no liability of the fat catching fire; and when making toast in the oven much better results will be obtained if the door is left slightly open. Many of the newer gas stoves are made with a sort of openwork arrangement in the door of the broiling oven, which is quite useful for admitting air into this oven.—Pictorial Review.

Admiral Peary's Lucky Number.

Even so practical a man as Admiral Peary has his little superstition and is not ashamed to confess it. Talking at a dinner in his honor, held in Washington the other night, he called attention to the fact that six is his lucky number. He was born on the sixth of May; the ship in which he reached "farthest north" prior to the discovery of the pole left land on the sixth of March; the Roosevelt, on its voyage that achieved the coveted goal, sailed from New York on the sixth of July; the pole was reached on the sixth of April, and the wireless message from the Labrador coast announcing the discovery was flashed on the sixth of September. We hope six has not lost its charm for the admiral, and that in years to come it will bring him further successes and renown.

Cacao Used as Currency.

Cacao passed as currency among the natives of Central and South America at the time of the European conquest, and that despite a plentiful supply of gold. Joseph Acosta, in 1610, tells us the Indians used "none of their gold or silver for traffic in or buy withall, and unto this day the custom continues among them that instead of money they use cacao." The Astecs of ancient Mexico also used "cacao" as small change, as many as 8,000 beans being counted legal tender. The value of the beans may be judged from the fact that "a tolerably good slave" could be purchased for 100 of them.—London Chronicle.

TRY THIS EASY WAY TO CLEAR YOUR SKIN WITH RESINOL SOAP

Bathe your face for several minutes working the creamy lather into the skin gently with the finger-tips. Then wash off with more Resinol Soap and warm water, finishing with a dash of clear cold water to close the pores.

Do this once or twice a day, and you will be astonished how quickly the healing, antiseptic Resinol medication soothes and cleanses the pores, removes pimples and blackheads, and leaves the complexion clear, fresh and velvety. In severe cases a little Resinol Ointment should also be used. Resinol Soap is sold by all druggists. —Adv.

Just a Weigh He Had.

"Say," queried the customer as he sized up the ton of coal that had just been dumped in his cellar, "did your boss weigh that coal on ambuscade scales?"

"Wot do you mean by ambuscade scales?" asked the puzzled driver.

"Those that lie in weight," explained the freight payer.

Same Old Canine.

Little Willie—Say, maw, have they got a dog over at Deacon Smith's?

Mamma—Not that I know of, dear; but why do you ask?

Little Willie—'Cause when I was over there yesterday I heard Mrs. Smith tell the cook to rush the growler as soon as the coast was clear.

How to avoid Operations

These Three Women Tell How They Escaped the Dreadful Ordeal of Surgical Operations.

Hospitals are great and necessary institutions, but they should be the last resort for women who suffer with ills peculiar to their sex. Many letters on file in the Pinkham Laboratory at Lynn, Mass., prove that a great number of women after they have been recommended to submit to an operation have been made well by Lydia E. Pinkham's Vegetable Compound. Here are three such letters. All sick women should read them.

Marinette, Wis.—"I went to the doctor and he told me I must have an operation for a female trouble, and I hated to have it done as I had been married only a short time. I would have terrible pains and my hands and feet were cold all the time. I took Lydia E. Pinkham's Vegetable Compound and was cured, and I feel better in every way. I give you permission to publish my name because I am so thankful that I feel well again." —Mrs. Fred Behnke, Marinette, Wis.

Detroit, Mich.—"When I first took Lydia E. Pinkham's Vegetable Compound I was so run down with female troubles that I could not do anything, and our doctor said I would have to undergo an operation. I could hardly walk without help so when I read about the Vegetable Compound and what it had done for others I thought I would try it. I got a bottle of Lydia E. Pinkham's Vegetable Compound and a package of Lydia E. Pinkham's Sanative Wash and used them according to directions. They helped me and today I am able to do all my work and I am well." —Mrs. Thos. Dwyer, 989 Milwaukee Ave., East, Detroit, Mich.

Bellevue, Pa.—"I suffered more than tongue can tell with terrible bearing down pains and inflammation. I tried several doctors and they all told me the same story, that I never could get well without an operation and I just dreaded the thought of that. I also tried a good many other medicines that were recommended to me and none of them helped me until a friend advised me to give Lydia E. Pinkham's Vegetable Compound a trial. The first bottle helped, I kept taking it and now I don't know what it is to be sick any more and I am picking up in weight. I am 20 years old and weigh 145 pounds. It will be the greatest pleasure to me if I can have the opportunity to recommend it to any other suffering woman."—Miss Irene Froelicher, 1923 Manhattan St., North Side, Bellevue, Pa.

If you would like special advice write to Lydia E. Pinkham Med. Co. (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

Monthly Magazines

MONTHLY Magazines, for the small dailies and weeklies, similar to those used by the big city papers, are the only means by which large papers can be produced at a very small cost, and are subscriber getters. For further information WRITE

Blackening of Silver.

The housewife who knows that egg darkens silver is often at a loss to account for the stains that occur when she has not used egg. The sulphur which causes the blackening of silver is abundant in other substances besides eggs, particularly in cabbage, rubber of all kinds, hair, leather and white paper. Rubber gloves, elastic bands and the mats commonly used in sinks often darken silver. Silver should be placed in drawers or cases lined with colored paper, cloth or velvet, as the white materials have commonly been bleached with sulphur.—Department of Economics, Nebraska College of Agriculture.

CONSUMPTION TAKES 350 PEOPLE DAILY

Over 350 people succumb to consumption every day in the United States.

Science proves that the germs only thrive when the system is weakened from colds or sickness, overwork, confining duties or when general weakness exists.

The best physicians point out that during changing seasons the blood should be made rich and pure and active by taking Scott's Emulsion after meals. The cod liver oil in Scott's Emulsion warms the body by enriching the blood; it peculiarly strengthens the lungs and throat, while it upbuilds the resistive forces of the body to avoid colds and prevent consumption.

If you work indoors, tire easily, feel languid or nervous, Scott's Emulsion is the most strengthening food-medicine known. It is totally free from alcohol or any stupefying drug. Avoid substitutes.

14-42 Scott & Bowne, Bloomfield, N. J.

Snooping Spinsters.

"Queer how nervous elderly maiden ladies get."

"Isn't it? Why, I have an aunt who if she lived near a river would look under the bed of it every night before going to sleep."—Boston Transcript.

Ship Leaped Over Torpedo.

Capt. J. W. Bell of the British steamship Rio Larges, was in New York recently wearing the medal awarded by King George for distinguished service. The captain was also voted $6,500 by the British admiralty for sinking the first German submarine lost in the war.

On February 28 Captain Bell, in charge of the Thordis, a steamship of 1,000 tons, was proceeding to an English port when he sighted the periscope of a submarine off Beachy head. An instant later a torpedo was sent at the Thordis. Captain Bell ordered full steam ahead and in the rough sea managed to jump the torpedo, as his boat leaped the waves while the torpedo kept its own level. Captain Bell then rammed the submarine and sank her.

He Was Covered All Right.

As he crawled out of the wreck of his auto a solicitous friend asked:

"Are you covered?"

"Yes," he said sadly; "with mud, blood, chagrin and insurance. Is that enough?—Detroit Free Press.

Motor Vehicle Law

The new motor vehicle law which went into effect January first, makes a number of changes in existing laws for the regulation of automobile traffic. It provides among other things that automobiles must carry, from half hour after sunset to hour before sunrise and at all times when fog and other conditions require, these lights: Two white lights in front, visible 500 feet, and one red light behind visible 500 feet, the number plate to be illuminated by a white light in the rear, so as to be visible for 50 feet.

The front lights shall be permanently dimmed so as to prevent any glare and so that the center rays shall strike the ground not to exceed 75 feet in front of the auto.

Horse drawn vehicles must have a light on the left side visible for 200 feet; motorcycles and bicycles must have a white light in front and either a red light or a green reflex mirror in the rear.

Auto drivers must prevent unusual noise and "cut outs" shall not be used in any incorporated city or closely built up community.

Number plates must be displayed not less than 16 inches from the ground and must be free from dirt and grease.

Warning sounds by horns, bells or whistles must be made when necessary and not at any other times.

Speed shall not exceed 30 miles an hour at any time, or 20 miles an hour where the territory is closely built up, or 15 miles an hour in the business district of any incorporated city or town, or 10 miles an hour at crossings and intersections.

Vehicles passing from rear shall go to left, after giving an audible signal and shall not turn to the right until reasonably clear.

Autoists must use every reasonable precaution to prevent frightening horses and shall slacken speed and stop at signal from rider or driver of horse.

In case of accident or collision the autoist must stop and render all possible assistance to injured, including taking to doctor.

A Wise Father

A wise man and father died the other day in Denver, says the Duluth Herald. His name was Bernard Beer, and he left a snug fortune, accumulated during years of strict attention to business. He also left two sons, who will get the fortune—if they deserve it.

His will provides that the two lads shall each be given $500 at once. Thereafter they are to get each year as much money as they have made and saved. That is to say, if at the end of the first year they have saved a thousand dollars apiece, they will get another each from the fahter's estate. If they have saved nothing they will get nothing.

Mr. Beer hardly needed to explain, as he did in his will, that in making this provision his aim was to encourage habits of industry and thrift in his sons, and to induce them to acquire a competency by their own efforts and judgment.

Sordid poverty spoils many, but it is very much to be doubted if it ruins more than do unearned riches gained by gift or inheritence instead of by hard work. Perhaps such poverty as that of the slums destroys more in numbers, but certainly not more in proportion. Of a hundred slum-born boys and a hundred boys born to luxury and inherited wealth more boys from the slums than from the homes of wealth will be worth while; for the slum-born boy must work out what is in him, and the rich boy has no such compelling need for self-development.

Seldom does anything worth having count for much unless it is gained by hard toil and personal effort and ingenuity. The Denver father who tied up his estate so his boys would have to earn it while earning an equal amount by their own efforts was wiser and better acquainted with human nature than most fathers.

Virus and Venom.

The difference between venom and a virus is very marked. Both are poisons and both of organic origin, but a venom is produced in secreting organs, commonly called poison glands, and is introduced into the system by means especially adapted for the purpose, such as stings or fangs. On the other hand, a virus is the result of disease or putrefaction and generally possesses the property of exciting in the system into which it is introduced the disease which produced the virus. A virus commonly produces little if any local disturbance. A venom generally causes great pain, often severe inflammation and swelling. Venom has marked local effect. Virus causes a general disturbance of the system.

System In Saving.

"The only good plan for saving is to make it an invariable rule to deposit something each week or each month," says a bank president. "Having thus put the money aside, it should be considered out of reach and on no account to be drawn upon except in case of sickness, loss of employment or death. It is surprising how money will pile up when such a system as this is followed. If every one who possesses any income at all would adopt the practice and stick to it, no matter how small the deposits might be, poverty would be well nigh abolished."

Orchard City Grange

Orchard City Grange held its usual supper and social on Tuesday evening, Jan. 11th. This being installation night, no other program was given. Dr. E. C. Abbot, past master of the grange, put on the installation work, assisted by Mrs. Abbot, and Mrs. Tibbets from Massachusetts. The work was done in a most acceptable manner.

The following are the officers for the year:

Master—E. K. Clendening.
Overseer—Robert Scholz.
Lecturer—Mrs. Ida M. Clendening.
Steward—F. S. Newcomb.
Assistant Steward—Stanley Smith.
Chaplain—Mrs. Ida R. Newcomb.
Treasurer—Mrs. Meda L. Waite.
Secretary—Mrs. Edna F. Keesling.
Gate Keeper—Homer A. Posten.
Ceres—Mrs. Tamer Bohnett.
Pomona—Mrs. Ada Coupland.
Flora—Mrs. Jessie Campbell.
Lady Assistant Steward—Mrs. Elizabeth Smith.
Organist—Florence Wade.

It was voted to hold the Grange Social at the Coffee Club, Tuesday evening, Jan. 18th, following the plan of last year.

Joint Installation

Thursday evening a joint installation of officers for Morning Light lodge, I. O. O. F. and Ada Rebekah lodge was held.

The new officers for the Rebekahs are:

N. G.—Miss Winnie Grizzle.
V. G.—Mrs. Minnie Densmore.
Warden—Mrs. Katherine Burns.
Conductor—Mrs. J. W. Lancaster.
R. S. N. G.—Mrs. Myrtle Johnson.
L. S. N. G.—Mrs. Emma Bulmore.
R. S. V. G.—Mrs. W. Carney.
L. S. V. G.—Mrs. Chas. Brown.
I. Guardian—Mrs. Elena Robinson.
O. " —Omar Posten.
Secretary—Mrs. Lillian Dowton.
Treasurer—L. L. Merrill.
Chaplain—Mrs. Hattie Dunham.

I. O. O. F.

N. G.—H. W. Morton.
V. G.—F. W. Coupland.
Conductor—E. A. Priestly.
Warden—H. R. Wade.
R. S. N. G.—A. F. Bulmore.
L. S. N. G.—E. C. Merrill.
R. S. S.—N. A. Blake.
L. S. S.—Chas. Townsend.
Sec.—O. D. Posten.
" Fin.—Jas. Burns.
Treas.—T. A. Robinson.
J. G.—Ellis Preston.
O. G.—T. L. Sharp.
Chaplain—H. Griffin.

District deputy grandmaster W. H. Keaton of Garden City Lodge, San Jose and District Deputy President Mrs. Barker of Stella Lodge, San Jose were installing officers.

Following the business meeting a "big eats" were enjoyed in the banquet room. The evening's festivities closed with a social hour and dancing.

Chas. Goodridge Dies In East

Word has been received telling of the death of Charles Goodridge, Dec. 31st, after a short illness of lagrippe developing into pneumonia. Charles was one of the popular boys who graduated at the local High School in 1914. He was a member of the debating team and a strong contender in the league tennis matches. Last year he attended Michigan U. at Ann Arbor and more recently was employed in a tire factory at Akron, Ohio. He had planned later to return here and attend Stanford. Charles leaves a host of mourning friends at his former hometown.

Notice To The Public

The Home and School Club wishes to announce to the public that Mr. William C. Allen, the world-known traveller and lecturer, will speak on "Peace" at the Congregational church, Friday evening, January 28th. Mr. Allen's talk will include the question of "Militarism in the Public Schools", a question we as mothers and fathers of the present generation would do well to consider. Remember the date, Jan. 28. There will be no charge or collection.

Bankers Banquet

The annual banquet for the officers and directors of the Campbell Bank was held at the home of J. F. Duncan Tuesday evening, Mrs. R. Alison and Mrs. R. G. Archibald assisting Mrs. Duncan.

L. D. Bohnett acted as toastmaster and the topics discussed were matters of interest relative to "Law and Banking."

Kept His Youth.

"How old are you, Wombat?"

"I'm fifty-two."

"You don't look it."

"Been married thirty-three years."

"You don't look that, either."—Kansas City Journal.

Naturally.

"What were you doing so long at the photographers?" "Merely awaiting developments."—Exchange.

Local and Personal

For Rent: Six room cottage, furnished or unfurnished. Apply to C. H. Whitman.

John Preston is still quite ill from his second attack of grip, being under the care of a nurse.

The raintall at Campbell for the season is 13.13 inches. Last season's at this time was 8.37 inches.

Mr. and Mrs. F. R. Glover are expected home the last of the week from their visit with their son at Riverside.

Fine prune trees on Almond root. We re as hamed to quote the prices they are o low see Geo. E. Hyde & Co. Phone 34J.

Mr. and Mrs. R. G. Archibald will go to Palo Alto tomorrow to spend the week-end with Mr. and Mrs. Easton Carter.

The bank is in receipt of a notice of a forger at large using the alias, Roy Allison. Do you suppose it can be? No, I don't believe it.

J. M. Butts has sold his home property across from the Grammar school to G. M. Ellison. Mr. Ellison will erect cottages on 1½ acre tracts to sell for homes.

G. E. Atkinson went up to San Francisco, Tuesday, to attend a memorial service at the First Congregational church for his brother, Dr. H. H. Atkinson of Harpoot, Turkey.

C. E. DeSelle, who has been putting the finishing touches on the exterior of his new home, is now laying a concrete walk around it. Would that others might follow his example.

Miss Vera Cochrane who has been at home for some time recuperating, underwent an operation for appendicitis Tuesday at Garden City Sanitarium. She is reported as doing nicely.

Miss Mary Miller left Monday for San Francisco where she has a position as companion and "older sister" to a wealthy young girl, who is motherless.

Miss Maxson has written that with the assistance of the physician and nurse she has taken a few steps and without the former pain. Her attendants are very greatly pleased with her improvement.

In looking over the records of the Congregational church, it appears that during Rev. Atkinson's pastorate, he has received into membership 179 persons, exactly the number of present members, according to the year book.

There is nothing so cheering as a newly papered room. After this epidemic of grippe, give your rooms a new coat of paper. It will do you more good than a change of climate. Call up E. O. Evans, the paperhanger, Campbell 49L. He will be glad to assist you in the work.

The Campbell Crammar school basket ball team met the Cambrian team on the Campbell court Wednesday afternoon and defeated them by the narrow margin of one point. Score 22-21. The line up of the teams was:

Cambrian		Campbell
Sturtevant	center	Gattrell
Chase	forward	Grattan
Lopes	"	Isbel
Beacock	guard	Kelly
Carson	"	Shell

Lionel Reed acted as referee.

Methodist Church Notes

Mrs. Bessie Kennedy is now in charge of the primary department of the Sunday-school as superintendent, and Mrs. Hall has taken her place as teacher of the Do-It-Now class.

Mr. Herrington resigned his position as president of the Epworth League on account of the press of other duties, his resignation being presented and accepted at the business meeting Wednesday evening. Mr. Alison was elected in his place for the balance of the league year.

The ladies of the church have received much praise for the splendid banquet and the manner in which it was served to the Improvement Club last week. Although they were not assured of an attendance of over sixty-five, they actually served well over an hundred and could have cared for still more. The Ladies' Aid is "all right."

Mr. Lloyd will preach Sunday morning. In the evening we have a union service of both congregations in the Methodist church at 7:30. Dr. A. H. Briggs will give the address in the interest of the California Campaign Federation, the organization in charge of the campaign to make California dry. Dr. Briggs is thoroughly conversant with all phases of this great subject, and he is a speaker of unusual ability. Individual subscriptions to the campaign will not be solicited at this meeting owing to special arrangements by which it is expected that the Campbell churches will each make a subscription in bulk, thus more evenly distributing the contribution over the entire church. A free-will offering will be taken, however, to help meet the immediate needs of the federation. Let us make this a real mass meeting of the people of this community and thus boost the campaign.

Miss Gertrude Coupland returned to Westwood Friday after spending her holiday vacation here with her family.

Best Year in Western States

Perhaps the most notable item in the year's record in the stimulation of metal mining is the Western States. Almost without exception the increases in production were large and in several States 1915 was the best year on record. In Arizona, which leads in copper, the output of that metal exceeded the previous record production of 1913. California continues to lead in gold and had the largest yield in 32 years, and with one exception in half a century. In Montana and Arizona record outputs of silver are reported and in Alaska the increased production of gold and especially copper made 1915 a much more prosperous year than even 1906 when Fairbanks and Nome were yielding their greatest returns of gold from bonanza placers.

Home and School Club

The Home and School Club met at the Grammar School, Jan. 4 and held a very enthusiastic meeting with a very large attendance.

Miss Atkinson's room furnished the entertainment, repeating two of their Christmas numbers, "Christmas in Foreign Lands," and a Song.

The topic for discussion was a continuation of "The Standard School."

The contests for pictures resulted in the following grades as winners, First, Fourth, Fifth and Seventh.

Mrs. G. E. Atkinson and Mrs. W. I. Merrill were appointed a committee to engage Mr. Allen who is a widely travelled and able speaker, to talk here on the question of "Militarism in the Public Schools."

It may not be a matter of general knowledge that there is serious agitation toward making military training compulsory in our public schools.

The club members are anxious for more enlightenment on the matter and it certainly needs the attention of all parents and citizens. The Club bespeaks a large audience for Mr. Allen when he comes.

Congregational Church

"The Friendly Church just around the Corner."

The theme for next Sunday morning will be "The Gospel of Christ's Enemies". Talk to the boys on "A Broken Chain", being in the series on "Ships and Sailing". No evening service in our church, union meeting in the M. E. church. Our first gun in the new Wet and Dry Campaign. A speaker from San Francisco will give the address.

C. E. and S. S. as usual. The Yonug Men's Bible Class will hold an open parliament on "Christianity and War". All men are invited.

Our mid-week meetings are now at 7:30 p. m. Wed., the 19th, we take up the study of the "Canon" or how the Bible was formed. A cordial invitation is extended to all to worship with us at any and all of these services.

GEO. E. ATKINSON, Pastor.

Correspondence cards are correct for the acknowledgment of Christmas gifts and greetings. Harry Smith has a neat assortment.
